4. LEVEL OF EDUCATION

Code	Title	Description
ISCED 2PV	pre-vocational programmes	Education which is mainly designed to introduce participants to the world of work and to prepare them for entry into vocational or technical education programmes. Successful completion of such programmes does not yet lead to a labour-market relevant vocational or technical qualification. For a programme to be considered as pre-vocational or pre-technical education, at least 25 per cent of its content has to be vocational or technical. This minimum is necessary to ensure that the vocational subject or the technical subject is not only one among many others.
ISCED 2VOC	vocational or technical programmes	Education which is mainly designed to lead participants to acquire the practical skills, know-how and understanding necessary for employment in a particular occupation or trade or class of occupations or trades. Successful completion of such programmes lead to a labour-market relevant vocational qualification recognized by the competent authorities in the country in which it is obtained (e.g. Ministry of Education, employers associations, etc.). Programmes in this category may be subdivided into two types: those which are primarily theoretically-oriented; and those which are primarily practically-oriented.
ISCED 2GPV	general and pre-vocational programmes	general and pre-vocational programmes
ISCED 2VPV	pre-vocational and vocational programmes	pre-vocational and vocational programmes
ISCED 2A	Lower secondary programmes to ISCED 3AB	Lower secondary programmes designed for direct access to level 3, in a sequence which would ultimately lead to tertiary education (i.e. entrance to ISCED 3A or 3B)
ISCED 2B	Lower secondary programmes to ISCED 3C	Lower secondary programmes designed for direct access to level 3C
ISCED 2C	Lower secondary programmes to labour	Lower secondary programmes designed for direct access to the labour market
ISCED 3	Upper secondary education	This level of education typically begins at the end of full-time compulsory education for those countries that have a system of compulsory education. More specialization may be observed at this level than at ISCED level 2 and often teachers need to be more qualified or specialized than for ISCED level 2. The entrance age to this level is typically 15 or 16 years. The educational programmes included at this level typically require the completion of some 9 years of full-time education (since the beginning of level 1) for admission or a combination of education and vocational or technical experience and with as minimum entrance requirements the completion of level 2 or demonstrable ability to handle programmes at this level.

ISCED 5	First stage of tertiary education (not leading directly to an advanced research qualification - level 5)	This level consists of tertiary programmes having an educational content more advanced than those offered at levels 3 and 4. Entry to these programmes normally requires the successful completion of ISCED level 3A or 3B or a similar qualification at ISCED level 4A. All degrees and qualifications are cross-classified by type of programmes, position in national degree or qualification structures (see below) and cumulative duration at tertiary.
