

Professional Development Workshop

Science, environment and entrepreneurship in eTwinning projects

8-11 October 2015, Warsaw, Poland

The Polish National Support Service is pleased to invite European Community for the Professional Development Workshop. This unique event is devoted to the world most challenging subjects in the field of education which are science, environment and entrepreneurship. The offer of workshops was designed to meet needs of both kind of audience – teachers who are already experienced in the theme and those who seek for the opportunity to explore it.

Language: English

Dimension: 120 participants from different European countries

Target group: teachers of any subjects and from all educational levels, interested in strengthening science, environmental and entrepreneurial teaching methods.
