## A. Introduction

This document aims to map the participation in the Tempus IV programme of the higher education institutions from the 27 European Union Member States and the 29 Partner Countries outside the EU.

Covering more than 1.200 individual institutions in the EU and in the Partner Countries, it provides the total number of Tempus projects in which they have been involved, differentiating them according to their role in projects as grantholder or as partner. The list of institutions has been verified in cooperation with the respective Tempus National Contact Points (NCP) in the EU countries and the National Tempus Offices (NTO) in the Partner Countries. When the name of an institution has changed over time, data for the respective institutions was updated and the most recent name was kept in the final tables. The same approach has been applied in cases of merger<sup>2</sup>.

The data provided covers the five first generations of Tempus IV projects (2008-2012). The figures were taken from the Tempus Programme database, taking into account Joint Projects (JPs) and Structural Measures projects (SMs).

The involvement of each institution should be interpreted in light of the duration of participation of the country concerned in Tempus IV, the role of the country in the programme (EU country versus Partner Country) and last but not least, the organisation of the national higher education system (size and scope of the system, total number of institutions, etc.).

---

<sup>2</sup> In very exceptional cases, such an approach may have led to double counting some projects (projects in which initially separated institutions were involved).
